Exponent®
Engineering & Scientific Consulting

Cristian Acevedo, Ph.D., P.E.

Senior Engineer | Civil and Structural Engineering
Menlo Park
+1-650-688-6952 | cacevedo@exponent.com

Professional Profile

Dr. Acevedo specializes in earthquake engineering, performance-based design, nonlinear structural analysis, and structural dynamics. He has experience designing steel, concrete, and wood structures as well as testing components and structures in the laboratory. Dr. Acevedo also has experience evaluating building damage.

Dr. Acevedo has extensive knowledge on the design of residential light-frame structures for improved seismic performance. He investigated the effects of enhancing the lateral strength and stiffness of wood light-frame structures through large scale quasi-static and dynamic testing. In addition, he developed nonlinear finite element models and conducted performance-based earthquake engineering analysis.

Prior to joining Exponent, Dr. Acevedo assisted in teaching graduate level structural engineering courses at Stanford University. He was also an intern at a structural engineering firm working on multi-unit wood residential structures.

Academic Credentials & Professional Honors

Ph.D., Civil and Environmental Engineering, Stanford University, 2018

M.S., Civil and Environmental Engineering, Stanford University, 2013

B.S., Civil Engineering, Florida International University, 2011

National Science Foundation Graduate Research Fellow, 2011-2016

Ronald E. McNair Post Baccalaureate Fellowship 6th Cohort, 2009-2011

Department of Energy & FIU Science and Technology Workforce Development Initiative Fellowship, 2008-2011

Licenses and Certifications

Professional Engineer Civil, California, #96306

Professional Affiliations

Earthquake Engineering Research Institute (Member)

Languages

Spanish

Publications

Acevedo C, Swensen S, Jampole E, Deierlein G, Miranda E, Fell B. Comparing the seismic performance of unibody and conventional construction of a two-story wood-frame house. Proceedings of the 11th National Conference in Earthquake Engineering, Earthquake Engineering Research Institute, Los Angeles, California, 2018.

Acevedo CA, Deierlein GG, Miranda E, Fell B, Swensen SD, Jampole EA. Development of a unibody system to improve the performance of lightweight residential wood structures. Proceedings of the 16th World Conference in Earthquake Engineering, 16WCEE, Santiago, Chile, 2017.

Jampole EA, Deierlein GG, Miranda E, Fell B, Swensen SD, Acevedo CA. An economic sliding isolation system for residential light frame structures. Proceedings of the 16th World Conference in Earthquake Engineering, 16WCEE, Santiago, Chile, 2017.

Swensen S, Deierlein G, Miranda E, Fell B, Acevedo C, Jampole E. Performance-based seismic assessment of a wood-frame house with strength and stiffness enhancements. Proceedings of the 16th World Conference in Earthquake Engineering, 16WCEE, Santiago, Chile, 2017.
