Exponent®
Engineering & Scientific Consulting

Joe Pearson, Ph.D.

Associate | Biomechanics
Atlanta
+1-678-412-4842 | jpearson@exponent.com

Professional Profile

Dr. Pearson provides technical expertise in the area of biomechanics, with a particular interest in tissue and joint mechanics and applications for injury mechanism assessment. His educational and research backgrounds combine bioengineering with a focus on engineering mechanics and biomedical engineering.

Dr. Pearson's research has involved understanding how musculoskeletal tissue injuries occur and developing material systems that mimic tissue structure and function to improve healing and mechanical stability. His knowledge of the relationship between injury and biomechanics applies directly towards investigating biomechanical accidents and related injuries. At Exponent, he has investigated injuries related to motor vehicle accidents and slips and falls.

Prior to joining Exponent, Dr. Pearson completed postdoctoral research at the Georgia Institute of Technology focusing on delivering therapeutics to reduce injury after rotator cuff tears in the shoulder joint. During his doctoral studies in biomedical engineering at the University of Texas at San Antonio and UT Health, he examined mechanically-stable material systems designed to replace torn knee joint tissue and designed an in vitro mechanical stimulation regimen with cells to improve the potential success of the systems. He also evaluated the biomechanical properties of bone tissue and related materials, vocal fold injections, muscle contraction, and tendon reconstruction surgical techniques.

In addition to his academic research, Dr. Pearson has prior experience investigating automobile accidents as an adjuster. He was formerly an officer in the Air Force, which provides him with an enhanced understanding of situations involving military personnel.

Academic Credentials & Professional Honors

Ph.D., Biomedical Engineering, University of Texas, San Antonio, 2019

M.S., Biomedical Engineering, University of Texas, San Antonio, 2016

B.S., Biomedical Engineering, Penn State University, 2009

Carlos Alvarez Endowment Fellowship, 2017

Licenses and Certifications

FAA Remote Pilot Certificate

© 2024 Exponent, Inc. All Rights Reserved

Prior Experience

Postdoctoral Researcher, Georgia Institute of Technology, 2019-2023

Graduate Research Assistant, University of Texas at San Antonio, 2014-2019

Instructor – Technology/Engineering/Math (TEM) Academic Inquiry, University of Texas at San Antonio, 2017-2018

Tissue Mechanics Course Teaching Assistant, University of Texas at San Antonio, 2016-2017

Senior Design Course Teaching Assistant, University of Texas at San Antonio, 2016-2017

Auto Adjuster, United Services Automobile Association (USAA), 2013

Officer, United States Air Force, 2009-2012

Professional Affiliations

Biomedical Engineering SocietyBiomedical Engineering Society

Orthopaedic Research Society (ORS)

Golden Key International Honor Society

Phi Kappa Phi Honor Society
